# FEEDLOT 85 CONCENTRATE

**novatek Feedlot 85** is a high protein, low inclusion fattening concentrate specifically for use in cattle. The concentrate can be used in different ratios with listed and other raw materials to formulate a beef fattening ration. It comes standard with ionophores as well as essential minerals & vitamins which will optimize energy utilisation in the rumen.

*"Feeding for Prosperity"*

Mixing Instructions:

Raw Material	Cafeteria System				Total Mixed Ration				
	Grower	Grower	Finisher	Finisher	TMR Starter	TMR Grower	TMR Grower	TMR Finisher	TMR Finisher
Maize Bran/ No 3 Meal	900		950		550	725	625	825	650
Corn & Cob		760		860					
Molasses		100		100			50		85
Maize Silage							300		250
Cotton / Sunflower Cake	50	100			150	100	50	50	25
<b>novatek</b> <b>Feedlot 85</b>	40	40	40	40	40	40	40	40	40
Grass	<i>ad lib</i>	<i>ad lib</i>	<i>ad lib</i>	<i>ad lib</i>	260	135	-	85	-
<b>Total (kg)</b>	<b>990</b>	<b>1000</b>	<b>990</b>	<b>1000</b>	<b>1000</b>	<b>1000</b>	<b>1065</b>	<b>1000</b>	<b>1050</b>

**100kg of Molasses can replace Maize Bran/ No3 Meal on a 1:1 basis in all rations containing no Molases.**

**TMR System:** Start adapting them by supplying the starter ration *ad lib* (free access) for 10 days, move over to grower or finisher ration depending on the size and age of the animal.

**Cafeteria System:** This basically means that the hay is fed on an *ad lib* (free access) basis away from the mixed concentrate. Feed grower for light calves followed by finisher. The adaption period will be as follows.

	Concentrate allocation / head(kg)
Day 1 - 3	2
Day 4 - 6	4
Day 7 - 9	6
Day 10 - 12	8
Day 13 onwards	<i>ad lib</i>

Packaging: 40kg
