WINTER 100 CONCENTRATE

novatek Winter 100 is a dry season concentrate aimed at minimising weight loss of grazing cattle throughout the dry season. It stimulates rumen microbial action by supplying mainly protein and energy as well as all essential minerals & vitamins.

"Feeding for Prosperity"

Mixing Instructions

Raw Material	Transition Lick	Maintenance Lick	Production Lick	Maintenance Feed	Production Feed
	Salt Restricted	Salt Restricted	Salt Restricted	Feed	Feed
No3 Meal / Maize Bran			500	200	500
Cotton / Sunflower Cake		300	150	600	300
novatek Winter 100	150	300	150	100	100
novatek Rainfos 15	200		40		40
Salt	350	300	150		
Molasses	50	100	100	100	100
Total	750Kg	1000Kg	1090Kg	1000Kg	1040kg
Feeding Circumstances	Green grass starts seeding	Abundant dry grass available	Scarce dry grass / Lactating Cows	Abundant dry grass available	Scarce dry grass / Lactating Cows
Crude Protein (min)	30%	40%	24%	26%	24%
Intake/day (min)	200g	400g	1000g	800g	1000g
Intake/day (max)	350g	650g	1500g	1300g	1500g

If no molasses is available, replace it with No3 Meal / Maize Bran.

Feeding Instructions:

It is important to salt saturate cattle who are going to receive the salt restricted licks on an *ad lib* (free choice) basis. Supply salt continuously for at least 7 days before allowing them free access to the lick.

Where animals are kraaled during night time, feed the Maintenance Feed in the late afternoon and not in the morning. Also ensure enough trough space when feeding the Winter Feed.

novatek Winter100 contains urea, when mixed and fed correctly the urea poses no threat to beef cattle, if urea poisoning is suspected dose animals with 1500ml of vinegar immediately.
